Gloucester City, NJ 08030-2337

Dear Bill,

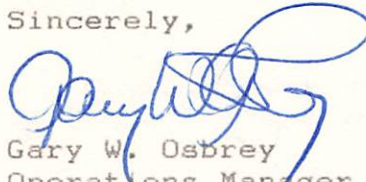

I'm writing to verify your DX report of April 23, 1991.

WINY is a 5,000 watt non-directional daytimer with a pre-sunrise power of 440 watts. We operate at 1350 khz. Our antenna is 204 feet, overall and located on Nancy Drive in Putnam. Our studios are located at 45 Pomfret Street, Putnam. We broadcast in AM stereo using Motorola AM Stereo. We use a Nautel transmitter and Optimod processing. We are on the air from 6:00 a.m. to 6:00 p.m. seven days a week. Our format is adult contemporary. We rarely receive DX reports.

I was thrilled to receive your report. That was my morning show that you were listening to. I'm on the air from 6-9 a.m. Monday through Saturday. I've been at WINY for ten years. I've worked at several stations in the Rhode Island and Massachusetts area. The farthest DX report I ever received was when I was working an overnight shift at WSAR -AM in Fall River, Massachusetts, a 5,000 watt directional station. The report came from a DX'er in Finland. He forwarded a tape of WSAR. That's quite a distance!

Thanks for the report and happy DX'ing!

Sincerely,

Gary W. Osbrey
Operations Manager
WINY Radio
